## Insights

Platforms with higher average daily usage also show a higher percentage of students reporting academic performance impact.

More than 90% of severely addicted users on platforms like TikTok and Snapchat report academic performance impact.

TikTok, Snapchat, and WhatsApp together account for over 60% of high-addiction users, making them the highest-priority platforms for targeted intervention programs.

## Platform Risk Matrix: Addiction vs Mental Health

Platform ● Facebook ● Instagram ● KakaoTalk ● LINE ● LinkedIn ● Snapchat ● TikTok ● Twitter
